# CREDIT UNION CORE PROCESSORS

sponsored by jack henry™

 $\rightarrow$ 

CU\*Answers is a network that is driven by customer-owners in the credit union industry to make cooperative business charters prosper. We're a technical network where one owner-one vote governance ensures balance, win-win outcomes, and that every participant's agenda is good for the community. If your agenda is to build communities with credit union organizations then take a look at cuasterisk.com's community builder programs. In an industry where starting a credit union is getting harder, why not start a network to foster more than a customer? Inspire customers to own it all and build something bigger as vested peers.

55 Core Processor Contact Information

Dear Credit Union Executive,

It's with pleasure that I'd like to introduce you to the 2023 *Supplier Market Share Guide: Credit Union Core Processors.* This latest edition of the guide offers valuable insights to help you compare, contrast, and consider today's core systems.

At Jack Henry<sup>TM</sup>, our advocacy for credit unions like yours is rooted in our belief that the world is a better place with community and regional financial institutions. During our nearly 50-year journey of growing and expanding our portfolio of technology solutions and services, core processing has certainly evolved – and so have we!

We are committed to **technology modernization** efforts that are based on the following key strategies:

- Unbundling the core to rebundle and future-proof banking.
- Integration options that support an open philosophy (open APIs).
- Ongoing and deep integration of capabilities to serve you and your members.
- Operating as a complete banking ecosystem.

This modernized technology experience delivers proven capabilities for core, digital, payments, lending, financial crimes prevention, and more.

In August, we announced <u>the consolidation</u> <u>of our three previous brands</u> – Symitar<sup>®</sup>, Jack Henry Banking<sup>®</sup>, and ProfitStars<sup>®</sup> – into a singular one, **Jack Henry<sup>TM</sup>**. We remain proud to be known to credit unions for our **Symitar** core processing solution.

Jack Henry is a well-rounded financial technology company strengthening the connections between people and their financial institutions through technology and services that reduce the barriers to financial health – with the purpose of empowering

SHANON MCLACHLAN, PRESIDENT, JACK HENRY CREDIT UNION SOLUTIONS

people and communities to gain the financial freedom to move forward.

As the industry continues to change, we're taking steps to ensure you are equipped with the technology innovations you need to serve members and support their financial health. Jack Henry has also formed strategic relationships with a variety of fintechs to strengthen our technology modernization strategy and support an open ecosystem. We welcome third-party integrations via our developer portal at jackhenry.dev, and we have embedded high-grade fintechs into our platform to provide benefits that may otherwise not be as easily accessible to credit unions. In addition, we will continue to evolve and support our existing core systems and complementary solutions as we build new core component services on the cloud, including new account opening, wire processing, deposit processing, and account servicing over the next several years.

I hope you'll strongly consider our people-inspired technology when it is time to select a core processing solution. We appreciate your commitment to your members and will remain focused on serving the credit union community. Visit our newly updated website at **jackhenry.com** to learn more about how you can deepen member relationships through innovative technology that breaks down the barriers to financial health.

## THE RIGHT TOOLS AT THE RIGHT TIME

Competitive rates and great service will only get you so far.

BY AARON PASSMAN

AARON PASSMAN, EDITORIAL DIRECTOR, CALLAHAN & ASSOCIATES

With competition more intense than ever before, it's never been more important for credit unions to deliver a high-quality service experience that meets — or exceeds — members' expectations. That daunting task becomes even more difficult without the right tools in place.

With that in mind, Callahan & Associates offers its annual *Supplier Market Share Guide: Credit Union Core Processors*, a publication designed to help industry leaders better understand the core landscape and the variety of options available.

This year's edition includes valuable features readers have come to expect, including extensive market share data that breaks down the core provider landscape by asset size, number of credit union clients, members served, and more. In the Platinum Profiles, readers can find information on some of the financial service industry's biggest players the high-level company overview includes credit unions served, client financials, integration details, and more. The 2023 guide also offers expert opinion on how leading platform providers are adapting to an ever-evolving market, plus insights from three credit unions at various stages of the conversion process.

G IT'S NEVER BEEN MORE IMPORTANT FOR CREDIT UNIONS TO DELIVER A HIGH-QUALITY SERVICE EXPERIENCE THAT MEETS – OR EXCEEDS – MEMBERS' EXPECTATIONS.

Producing this guide is a collaborative effort among multiple teams at Callahan, but this year we're particularly grateful for assistance from Jack Henry, which has sponsored the 2023 edition and also provided key insights.

As always, we welcome feedback from readers. If there are stories or insights we've missed — here in print or on CreditUnions. com — we want to hear from you. Good or bad, please send your feedback to apassman@ callahan.com. My inbox is always open.

Yours collaboratively,

#### **Aaron Passman**

### THE CORE PLAYERS IN CREDIT UNION LAND

The annual Supplier Market Share Guide: Credit Union Core Processors tells you who's who and what's up among providers of the most critical of technology infrastructure.

BY SHERRY VIRDEN

Long-standing trends are continuing in the core processing space as industry consolidation drives the number of credit unions down while the movement's engagement with the American public just keeps growing.

And speaking of long-standing, we're excited to once more share with you industry-leading data and insight from credit union and vendor experts alike in our annual *Supplier Market Share Guide: Credit Union Core Processors*.

These tables and graphs will help the decision-makers inside your organization assess where your current core provider – or others you may be considering – stands in the industry and among its peers. That includes market share data by provider and platform on pages 20 through 34, and our unique Platform Profiles on pages 35 through 53. There you can dig deep into aggregate overviews of select providers accompanied by minimum, average, and maximum financial performance metrics for credit unions on their respective cores.

Staying current with financial technology is essential to providing the kinds of services members demand. Choosing and converting platforms can be arduous and making the most of the features and capabilities of your current system or other alternatives is a continuous process. This year's guide also includes insight from industry leaders on those topics and more.

### SYMITAR REBRANDS WHILE THE GIANTS REMAIN JUST THAT

Perhaps the biggest news in core processing in the past year is the August announcement that Jack Henry & Associates has consolidated its three industry brands – Jack Henry Banking, ProfitStars, and Symitar – into one brand: Jack Henry.

The Episys name is being dropped and the credit union platform will simply be known as Symitar. Brand names aside, it remains a major player, combining with Fiserv to claim 39.4% of the credit union market by number of clients.

Fiserv actually lost 49 basis points of market share from 2021 to 2022 but remains the market leader, with a share of 28.9%. At this writing, 1,432 of the 4,957 cooperatives in the Callahan database are on Fiserv platforms.

Jack Henry grew its share by 17 basis points over the same period but its 523 clients include 186 institutions above \$1 billion in assets. That's nine more than last year. Fiserv, meanwhile, added two and now has 158 above the \$1 billion mark. In the \$250 million-\$1 billion segment, Jack Henry holds a close second at 211 to Fiserv's 228 credit unions. Fiserv also leads the market in clients in each other asset band.

### THE MOMENTUM LEADER AMONG A SHRINKING MARKET

Corelation saw the most significant client growth in 2022, adding 23 new users to its KeyStone platform. That grew the company's roster to 145 credit unions and its market share by 55 basis points to 2.9%.

There were only four new credit unions joining the movement in 2022, and the total number of active shops fell by 179 over the past 12 months to dip below the 5,000 mark at 4,957 as of June 2022. Fiserv was the core processor of record for 25.7% of those 183 credit unions lost to mergers or closures in the past year. But the global financial services technology giant still has 1,432 credit unions on its cores, by far the most of any individual firm.

Eight out of the 29 cores with client lists totaling at least \$400 million in assets gained clients year over year, while 16 lost clients and five maintained their number of users.

#### THE PLATFORM PLAYERS

The Episys name is no more, but in 2022 it remained the leading single platform, with 690 credit unions across three providers – Jack Henry (523), Member Driven Technologies (99), and Synergent (68). In total, 13.9% of credit unions in the country use that system.

Meanwhile, Platinum, FedComp's platform, came in second, with 468 total credit unions and a 9.4% market share. That marks a decline of 37 clients over the year as the presence of very small credit unions – this venerable company's market – continues to fade. There also are 19 fewer users of Finastra's UltraData platform.

On the plus side, the CU\*BASE platform gained 22 new users, the most for any single platform over the year.

### CREDIT UNION CORE ENGAGEMENT IN A DYNAMIC MARKET

While the number of credit unions continues its decades-long decline, some key measures of the industry's health just keep hitting new highs. Shares, for instance, increased \$140 billion, or 8.1%, from \$1.7 trillion as of June 2021 to nearly \$1.9 trillion as of June 2022. Loans were up \$194.5 billion (16.1%) from \$1.2 trillion to \$1.4 trillion during the same period.

And perhaps most importantly, the number of members increased by 4.2% from June 2021 to June 2022, adding 5.4 million in a single year to reach 133.9 million. The industry must be doing something right as it sticks to its core values while responding to new fintech imperatives.

Indeed, the explosion of digital and mobile banking and payments hasn't changed an essential dynamic: the core platform's essential role as the central repository and transactor of data needed to meet daily banking needs.

That platform also is typically a credit union's largest expense after personnel and physical space. On these pages, you'll find data-driven information and insights you need to assess your current provider, consider the competition, or both. <sup>(3)</sup>

### FOR COMMUNITYAMERICA, LESS CORE IS MORE

The Kansas City credit union had separate systems for personal and business banking, but expects to gain efficiencies by combining the two systems into one.

BY MARC RAPPORT

Converting from one core platform to another presents enough of a challenge but CommunityAmerica Credit Union (\$4.9B, Lenexa, KS) recently had double the fun by converting two into one. As of Sept. 6, Kansas City's largest cooperative is running on Fiserv DNA after nearly three decades on Fiserv Spectrum and six years on Finastra Phoenix.

The former is a legacy retail platform while the latter is for business banking, and CACU expects to realize immediate benefits from integrating those two lines of business into one back end.

ANDREA GATES, DIRECTOR OF CORE TRANSFORMATION, COMMUNITYAMERICA CREDIT UNION

#### **CU QUICK FACTS**

CommunityAmerica Credit Union DATA AS OF 09.30.22

LENEXA, KS \$4.9B

279,271 MEMBERS 28

BRANCHES

11.61% 12-MO SHARE GROWTH 4.78% 12-MO LOAN GROWTH 0.18%

"Before our core conversion, our teams had to support two different platforms – and one of them was a 28-year-old platform with significant risk," says Andrea Gates, the credit union's director of core transformation. "Beyond the obvious hurdle of doubling up work, we had an inconsistent experience before for both the

member and our employees. Everything is now housed in one program, and it has become much easier for everyone."

Gates adds the new system has better support, a full set of API capabilities and multiple integrations, enabling personalization that benefits members and their individual situations.

"This new, streamlined process has enhanced our personalized service more than ever before," says Gates, who has held multiple roles in her 26 years with the 279,000-member cooperative.

### A SIGNIFICANT EFFORT THAT'S NOW PAYING OFF

Not that it was a walk in the park getting there. Gates says data mapping and converting from account-centric to person-centric systems were the biggest challenges. "There was significant impact on critical integrations like online banking," she says. "We worked hard to understand the complexity early and allocate adequate time for planning and implementation. Understanding this gave us time to add significant effort to catch up in the last few months of the conversion project."

Now, business and natural-person accounts alike are handled by the core's integration with Digital Insight software for online and mobile banking, and MeridianLink and Terafina for account opening. From the members' perspective, Gates says, "Anyone can now go to any branch to do their banking. This allows anyone who has multiple accounts, whether they're personal or business, to access their money and get assistance from our front line much more easily. In turn, the front line only has to log on to one program to view those accounts, which saves them time."

Going forward, CACU expects to benefit from faster time to market for new products and efficiency gains from simply being on one platform instead of two. And they expect to get better at each as they get more proficient and creative with their technology capabilities.

"One of the greatest things is now everyone is an expert," Gates says. "Everyone knows what they're doing. So, we'll continue to build the processes and utilize the system the best way we can. It's always a learning process that we'll continue to evaluate and adjust going forward."

### CommunityAmerica's 3 Ingredients For Conversion Success

What went best during CommunityAmerica Credit Union's recent core conversion?

"Well, I don't mean to brag, but so many things!" exclaims Andrea Gates, director of core transformation. "Ultimately, we retired a 28-year-old system and combined two cores into one while delivering a very smooth process to our members."

Here, in her words, are CACU's three ingredients to that secret sauce:

- **1. Plan and plan some more.** "Effective planning is key. It seems obvious to say it, but it really is true: organizational alignment to a single goal is incredibly important. Business and tech teams had to march arm and arm and be on the same page with the same cadence with a clear, well-articulated plan. Everyone needs to understand the clear milestones, activities, the testing and their results, on and on, leading up to the switch. The process of getting to the actual conversion is so important."
- **2. External communications.** "We created a communication plan that took into account every member's desired form of communication, as well as timing. We didn't start too early, and we communicated across various platforms including letters, emails, videos, and a dedicated webpage.

"We also waited to post anything on social media until right before [the conversion began] to help prevent fraudsters from going after our members. When we did start posting, we responded to members' questions and comments, and we listened to what members were asking our member service center so we could post topics that were coming up often. Basically, we wanted to get ahead as much as possible."

**3.** Internal communications. "Internal communication is just as important as external. We had committees, leaders, and teams who all knew their roles and understood the plan for everything leading up to and including the conversion itself. We celebrated milestones and shared challenges. Everyone was a part of it and we wanted everyone to feel that way the entire time."

7

## CORE CONVERSION NOT CHALLENGING ENOUGH? JUST ADD COVID.

Industrial FCU modernized its services with major upgrades, but some of the biggest hurdles came with the onset of the pandemic, leading to some senior managers "camping out" in branch lobbies after going live.

BY MARC RAPPORT

**B** eing the biggest is not necessarily the best. That's a core lesson Industrial FCU (\$300.7M, Lafayette, IN) can share as it continues its journey forward with a new core processing platform.

The 30,000-member Hoosier State cooperative converted to a new FLEX platform in March 2021 after running on the same Electronic Record Keeping Services system since 1989.

KEVIN UMLAUF, PRESIDENT AND CEO, INDUSTRIAL FCU

"We were the largest credit union on our old system, and we're now in the middle of the pack," says Kevin Umlauf, Industrial's president and CEO for the past five years. His shop is enjoying new abilities to collaborate on innovations with its core provider as well as to use its API to integrate ancillary products from the vendor itself or whatever other provider the credit union should choose.

While Umlauf had good things to say about Industrial's previous system, it did not offer integration with third parties. "We really felt this was holding us back from growing," he says.

Now, members can expect such services as remote deposit capture, mobile wallets, and automatic ACH transactions with other financial institutions, all basic functionalities for credit unions expecting to compete with larger financial services providers.

"Now our goal is to maximize our members' ability to self-service

through our new digital channels and to streamline processes for in-person transactions" with the 10-branch cooperative. That streamlining also includes replacing several manual processes that in some cases still relied on paper forms.

The process also served as a reminder that while achieving ROI following a conversion can be elusive,

"Our previous system was very economical from a cost standpoint, and we weren't expecting an immediate increase in net income with our conversion," Umlauf says. "We were focused on our ability to grow. Since converting, we've had the most rapid asset growth in my 10 years at the credit union. I wouldn't say that it's all attributed to the conversion, but I don't believe our pace of growth would have been the same."

CU QUICK FACTS Industrial FCU DATA AS OF 09.30.22 LAFAYETTE, IN \$300.7M ASSETS 29,880 MEMBERS 10 BRANCHES 7.15% 12-MO SHARE GROWTH 14.31% 12-MO LOAN GROWTH 0.38%

8

ROA

### CONVERTING DURING COVID-19: "CAMPING OUT" IN THE LOBBIES

The biggest technical challenge in the conversion was transferring data from the old system to the new one. "That was one of my biggest fears going into this," says Umlauf, but the "tremendous job" his team and his core vendor did in that regard allayed those fears.

Of course, the pandemic arrived shortly after the contract with FLEX was signed, which magnified all the challenges the credit union and its core processor would face as they executed a conversion amid the global health crisis.

Not surprisingly, those challenges dwarfed the technical issues. "We had to pivot our training program to allow for social distancing," recalls the Industrial senior manager. "FLEX had to put more resources into this and create some virtual training sessions. We also had lobby restrictions and people working remotely."

While the credit union went out of its way to "overcommunicate our conversion to members, there were many who were blindsided," says Umlauf. "This led to a ton of call volume in our call center and long lines in our lobbies."

In response, Umlauf says, senior managers "camped out" in the lobbies to help members log into the new digital banking services. "Once we got members signed into the new system, they were pleased," he says.  $\bigotimes$ 

### **5** Core-Switch Best Practices From Industrial FCU

Industrial FCU had a lot to consider as the Indiana cooperative made the switch to a new platform from the core system that had sustained the business for more than 30 years. Here, in his own words, President and CEO Kevin Umlauf shares best practices that helped ensure a successful journey from decision to deployment.

- Get out of the office. "We went onsite to many credit unions to help us make our decision," says Umlauf. "We looked at different cores and involved multiple people from Industrial on these trips. This allowed the doers to ask the right questions and provide great feedback on what they liked and disliked." Industrial leaders also visited the core's corporate HQ and met with users from other institutions to better understand the system and how it would enable them to network with other users.
- Get everyone involved. "Involve all layers of staff, not just leaders, when making decisions about the framework of the system. The leaders don't always know the best processes for how things should go." Umlauf adds that it's equally important to involve the whole team in the training plan to ensure voices from all levels of the organization are heard.

- Make it fun. "The project can be grueling at times, as you're cleaning up old data and testing to make sure it works with the new software." One way to keep things lively, he suggests, is by creating contests for training on the new system.
- Practice makes perfect. "We mirrored transactions in the new system for the month leading up to conversion. This allowed staff to practice on the new system while we were still using the old system." Umlauf also emphasized the importance of over-communicating with members and testing the system extensively before launch.
- Bring in help when needed. "Strongly consider hiring a vendor to help with call volumes [after launch]," says Umlauf.

## **GREATER TEXAS / AGGIELAND CREDIT UNION** LOOKS FORWARD TO INNOVATIVE GROWTH BY RETIRING A 33-YEAR-OLD PLATFORM

The Lone Star State cooperative will run its new system through a data center while enjoying top-shelf integration with the growing fintech ecosystem.

BY MARC RAPPORT

Y reater Texas Credit Union / Aggieland Credit **U**Union (\$993.1M, Austin, TX) is knee-deep in the process of a core platform conversion that converting will allow the Lone Star State cooperative to keep growing in what its chief technologist calls "a fragmented, commoditized, and highly competitive industry."

KAYVEE KONDAPALLI, CIO. GREATER TEXAS CREDIT UNION

GTCU currently runs its core system in-house but plans to convert to a hosted solution. "We prefer to let the experts who are great at keeping the machines up and running and secure take care of that. We'll focus

### **CU OUICK FACTS**

**Greater Texas Credit Union** AUSTIN, TX \$993.1M ASSETS 81.954 19

10.17% 12-MO SHARE GROWTH 17.67% 12-MO LOAN GROWTH 0.63%

The 80,000-member organization has been running on Finastra's UltraData core since 1989 and expects to go live on the Fiserv DNA platform in mid to late 2023. Why no exact date? "This is a very complex project that essentially touches every employee and more than 40 partners," says CIO Kayvee Kondapalli.

our resources on innovating on top of this platform to produce the best possible member and employee experiences," Kondapalli says.

That, he says, will allow the credit union to focus on this: "Competition is our most significant challenge. If we're going to sustain growth and compete in a fragmented, commoditized, and highly competitive industry we must continuously innovate our products and product structure."

The bar isn't just being raised by other financial institutions. "We need a core system that can support a secure, personalized, omnichannel, and connected

member experience, with the ease of use that companies such as Netflix, Uber, and Amazon offer and that consumers have come to expect," says Kondapalli, who joined GTCU in 2020 with 17 years of credit union experience.

"We want that kind of experience across devices as well as brick-and-mortar and our contact center," he says, as well as the ability to automate processes while freeing staff to focus on "higher-level creative and innovative activities on behalf of members." The switch from an account-level to person-level view also will help facilitate that internal sea change.

### STACKING THE TECHNOLOGY IN THEIR FAVOR

Kondapalli and his team also are looking forward to leveraging a technology stack that provides a secure, compliant front end with the APIs to deeply integrate with current and emerging solutions from fintechs while leaving behind a hindering paucity of data. Also a plus is an ability to be part of what he calls the "continuous innovation ecosystem" that comes with being a client of such a large core processing and payments services provider.

Specifically, the GTCU CIO says, "We're looking ahead to having the capacity to partner with fintechs to explore leading-edge products and services such as cryptocurrencies, real-time payments, and life cycle products. This platform ensures scalability as we grow, both organically and through potential future mergers. It will also help us offer co-branded and contextual services for key partners such as Texas A&M University in College Station."

Another benefit they anticipate: "We'll be able to concentrate on hiring creative, innovative knowledge workers, such as data analysts, to help us continuously improve the member and employee experiences," Kondapalli says. "We want to be the employer of choice for the top performers among these professionals."

### **PEOPLE-INSPIRED INNOVATION**

The combination of service and commitment to community can help credit unions reinforce their member-centric nature during uncertain times.

BY NICOLE HARPER, DIRECTOR, JACK HENRY™ STRATEGY

As we reflect on the immense shifts that have occurred since the onset of the COVID-19 global pandemic, it's time to lean forward and embrace people-inspired innovation as the financial health movement and diversity, equity, inclusion, and belonging (DEIB) have gained unprecedented momentum. The <u>Cooperative Principles</u> for credit unions position the credit union movement as a leader in building and serving more diverse, equitable, and inclusive communities. Credit unions also have the ability to leverage a growing ecosystem of financial technology providers, fintechs, industry associations, and organizations united in a shared mission to improve financial health and inclusion for all. Together, this ecosystem represents a mighty force for good.

6 6 I BELIEVE FINANCIAL WELLBEING FOR ALL IS THE DEFINITION OF PEOPLE HELPING PEOPLE AS WE GO FORWARD.

Jim Nussle, CUNA President/CEO

### FINANCIAL HEALTH AND WELLBEING FOR ALL

New data reveals the erosion of recent financial health gains. According to the Financial Health Network's Financial Health Pulse<sup>®</sup> 2022 U.S. Trends Report, financial health in the U.S. declined for the first time in the project's five-year history of Pulse research. The percentage of people considered financially healthy returned to pre-pandemic levels as the end of pandemic-era government benefits, inflation, and stock market volatility shaped people's financial health. A broad swath of Americans experienced financial health declines, including some groups that historically have had high levels of financial health. These declines may foreshadow declines in other indicators, such as having a prime credit score and paying all bills on time.

Less than one-third of adults in the U.S. are financially healthy. Millions of Americans are struggling to spend, save, borrow, or plan in ways that allow them to be resilient and seize opportunities over time. These research findings raise important questions about the role financial institutions and their technology providers play in developing new solutions to help remove barriers to financial health. National Credit Union Foundation Executive Director Gigi Hyland commented on the importance of <u>financial wellbeing for all</u> in her keynote address at an industry conference recently, noting that credit unions were initially founded to help French-Canadian workers who were struggling financially. "In many ways nothing has changed," she says. "Those same struggles exist today. But the financial world is more complex and racial inequities are more profound. The wealth gap is growing ever wider. Credit unions' 'why' is based on humanity."

PURPOSE IS WHY WE EXIST. IT IS THE
 IMPACT WE WANT TO MAKE IN THE WORLD
 BEYOND PROFITS AND PRODUCTS.
 Anne Bahr Thompson, Author of Do Good

### A HIGHER BOTTOM LINE

Navigating disruption and financial fragmentation in light of the current economic and political climate, and long-term impacts of a global pandemic require financial institutions to lead in a world with volatility, uncertainty, complexity, and ambiguity. In response, we see financial institutions getting back to their roots as they renew their focus on purpose in banking. The pandemic placed a spotlight on the importance of doing well by doing good, as financial health, financial inclusion (especially access to credit), DEIB, and Environment, Social, and Governance (ESG) have become key topics of discussion.

A renewed purpose and mission to realize a higher bottom line has significant business benefits. U.S. consumers are nearly three times more likely to transact with financial institutions with high humanity. The majority (66%) of Americans believe financial institutions have a responsibility to support diverse and unserved communities. KPMG's paper, "Purpose Driven Work," tells us this view taps into the trend that employees are increasingly motivated to stay with a company if they believe the work they do contributes

11

# you put people at the heart of everything you do

So do we. We know your members – and your communities – are better off when you're at the center of their financial lives.

Together, we can break down barriers to financial health and strengthen the connections with the people you serve – protecting them from fraud; providing safer access to data and finances; and helping them save, spend, borrow, and plan. As your members move toward their goals, so does your credit union.

Jack Henry<sup>™</sup> is committed to supporting your efforts of service and putting your members and communities first.

For more information about Jack Henry, visit **jackhenry.com**.

to a bigger purpose. Today's workforce is looking for more from their jobs; they want a way to make a mark on society. With talent acquisition and retention as the top concern for CEOs per Jack Henry's latest <u>Strategic Priorities Benchmark Study</u>, it's ideal timing to help employees understand they're part of something much bigger than themselves when they work for a credit union.

In August 2022, Jack Henry announced the launch of a refreshed brand that reinforces its 46-year history of providing modern technology and services to community and regional financial institutions. As part of the rebrand, Jack Henry developed a new mission statement focused on strengthening connections between people and financial institutions through technology and services that help reduce the barriers to financial health. Jack Henry also became a member of the Financial Health Network and joined its efforts to unite industries, business leaders, policymakers, innovators, and visionaries to improve financial health. The rebrand also reflects the company's focus on corporate responsibility and being a force for good. Jack Henry is committed to environmentally friendly practices to support a strong future and was recognized by "Newsweek" as one of America's Most Responsible Companies in 2022.

Jack Henry is proud to be a part of a growing ecosystem of financial institutions, solution providers, the fintech community, regulators, industry associations like <u>CUNA</u>, and organizations like the Financial Health Network collaborating to help solve complex societal and technological problems within financial health and inclusion and ESG.

WE ARE PROVIDING MODERN TECHNOLOGY THAT PUTS COMMUNITY AND REGIONAL FINANCIAL INSTITUTIONS AT THE CENTER OF THEIR ACCOUNT HOLDERS' FINANCIAL LIVES TO HELP REDUCE FINANCIAL FRAGMENTATION AND PROMOTE HEALTHIER FINANCIAL DECISIONS. David Foss, Jack Henry Board Chair and CEO

#### CHOOSING THE RIGHT TECHNOLOGY PARTNER

Future-ready financial services will be built on a people-centric platform that brings together the best partners to create unique value that the competition simply can't deliver. For credit unions to reclaim the competitive advantage of service and trust, to innovate faster, to differentiate strategically, and to compete successfully, technology must have your needs (and the needs of your members) in mind. As part of its mission, Jack Henry announced its <u>next-generation</u> <u>technology strategy</u>, centered on the company's ongoing development of a single, cloud-native open-banking platform. This initiative builds on Jack Henry's industry leading, open-API digital banking platform, which enables easy access to a broad ecosystem of Jack Henry solutions and high-grade, third-party fintechs.

Your technology partner should deliver modernized technology that optimizes openness, speed, agility, and optionality while ensuring future-readiness. For example, Jack Henry is accelerating its multi-year next-generation technology strategy by teaming up with Google Cloud.

With the philosophy of people-inspired innovation, Jack Henry is working with credit unions to design solutions and strategies that achieve organizational goals – whether that's growing revenue, mitigating risk, balancing IT and regulatory compliance demands, growing membership, improving the member experience, or addressing any other <u>business challenge</u>.

### A FORCE FOR GOOD

We value the opportunity to empower credit unions to improve financial outcomes for members, businesses, communities, and the broader credit union movement. Our mission is to strengthen the connections between people and their financial institutions through technology and services that reduce the barriers to financial health. We're honored to meet our credit union clients where mission meets margin in our mutual aim to achieve a higher bottom line. Individually, we are leaders in people-inspired innovation. Together, we are an even stronger force for good capable of driving a brighter financial future for all.

For more information about meeting humancentric needs with next-generation technology, visit **jackhenry.com**.

### ENABLING GROWTH THROUGH EFFICIENCY

Efficient growth is focused on investment in the right developing trends to drive competitive advantage. BY PRESTON PACKER, CHIEF MARKETING OFFICER, FLEX

The past two years have seen strong credit union L industry growth, which has been attributed to pent-up demand in what has been called a rebounding economy. NCUA reported loan growth of 14.7%, membership growth of 8.1%, and net worth increasing at 13.9% in Q1 2021. This was met by digital transformation initiatives across many credit unions to meet member expectations in a transitioning consumer economy. Changes in card technologies, enhancements to digital wallet capabilities, and an evolving payments landscape have driven focus and investment over this time and heading into 2023. Digital transformation has ushered in the fintech revolution and credit unions have now been flanked by these non-traditional competitors while still facing their traditional forms of competition. Keeping track of the competitive landscape is now as demanding as meeting member expectations. Maintaining pace with the competition, while adding third-party solutions to avoid broad scale disruption to business models is noble, but potentially suffocating.

The past is not the present, just as "past performance is not a guarantee of future returns." While a growing economy was the action verb of the recent past, economic models are now forecasting a drop in growth through 2024. The Federal Reserve Bank of Atlanta has reported GDP growth in Q3 2022 at 2.9%, while the U.S. Bureau of Economic Analysis is predicting GDP growth to trend around 1.2% in 2023 and 1.7% in 2024. Couple these economic indicators with downward pressure to continue to enhance technology offerings and we are looking at an equation that is predicting reduced margins. Credit unions are not strangers to business constraints compared to larger competitors; our industry has operated with these limitations since the beginning. Constraints shouldn't be the focus; competitive advantage should be. Competitive advantage in this case refers to factors that allow credit unions to provide services better or more cheaply than the competition. These factors are

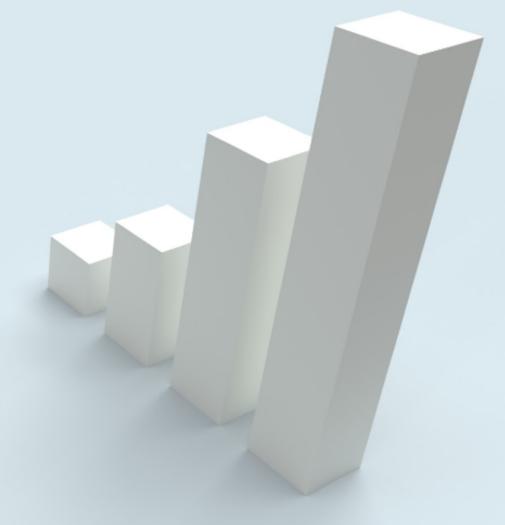

tied directly to cost structure, technology offerings, and member service. In some cases, the competitive advantages can be one in the same, such as cost structure and technology offerings. Delivering better and more integrated technology offerings should impact the bottom line.

AT THE HEART OF EFFICIENCY IS THE SIMPLE NOTION OF DOING MORE WITH LESS. IF YOUR CORE ARCHITECTURE REQUIRES YOU TO DO MORE WITH MORE, A REVIEW OF YOUR BUSINESS PROCESSES IS IN ORDER.

Optimizing core system architecture and infrastructure is one key to improving competitive advantages, while providing a path to increased operational efficiency. Without optimized core system architecture credit unions cannot be as efficient as necessary to gain significant competitive advantages. This is generally a result of manual processes or layered third-party solutions to perform operations that otherwise should be core based functions. At the heart of efficiency is the simple notion of doing more with less. If your core architecture requires you to do more with more, a review of your business processes is in order. Efficiency is realized when all credit union processes and objectives are aligned, including both staff and technology. As consumer behavior has changed and focus has increasingly become digital, core systems must adapt. This would include the ability to open new accounts, approve and fund loans, capture photo IDs and supporting documentation, and provision cards to be used in mobile wallets and retailer apps. If these digital components require separate vendors, the core equation becomes disparate and expensive. Some credit unions are leveraging their core architecture to do more with less. These credit unions are experiencing growth

## Enabling Growth through Efficiency

www.flexcutech.com 800.262.3539 through efficiency, while marshaling and creating competitive advantages.

### **GROWTH THROUGH EFFICIENCY**

Tucked against the backdrop of the Columbia River and protected by the Portland International Airport is Ironworkers USA Federal Credit Union. Ironworkers USA may not seem "big" at approximately 12,000 members and \$100 million in assets. However, credit union size is relative and at first glance never tells the whole story. CEO Teri Robinson started with the credit in 2009, with \$9 million in assets and 3,000 members. Teri took over a credit union that had suffered deep losses during the financial crisis and began working with her NCUA examiners through their net worth ratio restoration plan. With only six full-time employees, Teri began to make changes that would impact the credit union's bottom line, increase member engagement, and facilitate a growth strategy that would take her credit union from \$9 million to over \$100 million through organic growth!

According to Robinson, everything changed with technology. The first piece Robinson implemented was to transform the member experience. "If you look like a bank and smell and taste like a bank, how can members differentiate you from a bank?" she asks. To this end, the credit union removed their teller counters and implemented desks as a strategy to be more consultative with members. This was soon followed by technology investments such as remote deposit capture through the credit union's mobile app. At this point, Robinson notes, "Things really began to change." Providing traditional banking services through technology created a path for more important services to the credit union, such as lending. Robinson notes that her core architecture allows members to apply for loans digitally and complete the process in minutes. "That's a game changer, having the ability to process loans in a matter of minutes without a third party sitting on top of that process."

Robinson said having technology that helps her staff know her members has been a big part of their growth. For instance, making the credit score a part of the member view provides an ease in helping staff know their members. Knowledge is power in this case, because "you know who you are dealing with, which then allows you to meet their needs with products and services," she says. Having a holistic view of members through a single platform also allows the credit union to ask questions such as, "Do we offer you everything, or do we not?" Efficiency then shines because the credit union does not waste time getting to know the member, because having access to credit scores, account histories, and more in a single location provides a framework for who they are dealing with already, even if it is a new member. Robinson has been able to secure a national charter for ironworkers and their unions, expanding her footprint.

Having the correct core architecture in place before expanding her charter was serendipitous. The credit union has seen strong adoption of checking accounts and loan products from new members in other states compared to those who are local and have been with the credit union for 20 years or more. This serves to underscore how technology has assisted Ironworkers USA's growth. Onboarding members in new areas and seeing immediate adoption without brick-andmortar branches is attainable. Ironworkers USA has seen growth across all aspects of their business. In addition to asset and membership growth, the credit union has seen checking accounts increase from 616 in 2009 to over 5,000 in 2022; loans have increased from \$7.5 million in 2010 to \$70 million in 2022. The credit union has experienced loan growth of 20.1%, membership growth of 10%, and net worth growth of 24% as of Q2 2022. Today, Ironworkers USA has only 17 staff members who have worked to achieve a growth rate of 10x over the past 12 years.

**Preston Packer** is Chief Marketing Officer of FLEX, a core processor based in Salt Lake City, UT.

**FLEX** has disrupted the credit union core system marketplace by enabling efficient solutions for digital transformation and sustainable growth. FLEX will allow credit unions to launch a full-service digital banking suite with innovative member facing technologies and automated services. Credit unions will buy back lost time by remapping the digital journey and increasing member loyalty.

## 4 QUESTIONS EVERY CREDIT UNION SHOULD ASK ITSELF IN 2023

As the industry enters a new year, institutions of all sizes must ensure they have the tools to remain relevant. BY BOB WEST, CEO, CU\*SOUTH

The credit union industry is at an inflection point. There were more than 23,000 credit unions in 1969, and as of this writing, fewer than 5,000 remain. Mergers and liquidations have drastically increased in recent years, severely impacting the remaining number of credit unions left in the nation. What are these remnant financial institutions planning to do differently in the coming decade to preserve the industry and the ultimate ownership design that was once the driving factor to growing financial institutions?

The financial landscape is changing rapidly, especially with the rise of fintech companies, and their rapid development and deployment of innovative technology in the marketplace. Couple that with the increased regulatory pressure, the current volatile rate environment, increases in operating costs, and the competitiveness in the banking marketplace, and it has become incredibly difficult for smaller institutions to remain viable. The effects have created the need for many smaller credit unions to look for merger partners. These merged institutions can sometimes offer more products and services, additional capabilities, and frequently better loan and deposit rates. Even mediumto large-sized credit unions are looking to merge, bringing them increased scale. One of the areas worth discussing more often is the overall cost of technology these institutions use for core data processing. Without question, it certainly can be one of the highest costs in these organizations other than employee compensation and benefits.

Here are four questions for credit union leaders to consider in the year ahead:

### 1. ARE YOU HAPPY WITH THE SERVICE OF YOUR CURRENT PROVIDER?

Let's face it, service and support are critical to the success of any credit union. It would be best if you had verifiable SLAs and other metrics to measure your vendor's performance to meet your needs.

## 2. HAVE YOU COMPETITIVELY BID ON A CHANGE IN YOUR CORE PLATFORM?

Even if you don't change, this will be an opportunity to explore potentially lower pricing and higher service levels with your current provider.

### 3. DOES YOUR CURRENT PROVIDER DELIVER ENHANCEMENTS AT LEAST ONCE A YEAR?

If they are not updating your platforms other than regulatory updates, you need to ask why?

## 4. DOES YOUR PROVIDER STILL SELL YOUR CORE SOLUTION TO NEW CUSTOMERS?

If they are not currently selling your core platform to new customers, you should ask why? And what are their plans for your current system?

### WHILE A CORE PROCESSING CONVERSION IS NOT SOMETHING A CREDIT UNION WANTS TO DO, THE VALUE IT COULD BRING IS UNDOUBTEDLY WORTH EXPLORING.

The way forward for our industry is embracing partnership, networking, and collaboration, combining our strengths to make the finest and most comprehensive services and technology available to all credit unions, regardless of size.

### A PARTNER, NOT JUST ANOTHER VENDOR

CU\*SOUTH is committed to the credit union movement and serving members. That is why we deliberately chose a business model that would allow us to be a partner and not just a vendor.

For 17 years, we have invested in helping many smaller institutions stay relevant. Imagine a core with all the features needed to run a successful credit union builtin, plus ones you did not even know you could have, without the add-on prices charged by many other providers. Standard benefits for credit union members and staff include:

- ACH early pay
- Remote deposit capture
- Card controls in the mobile app
- Secure and easy e-sign
- Online account opening
- 1-click LOCs or credit card offers
- Member reward points programs
- Real-time data analytics & dashboards
- Compliance and auditing automation, like transaction pattern tracking
- And so much more.

Not only do we provide the core software, we offer critical ancillary services led by credit union experts; we help do the work while credit union staff focus on other areas of the business. Accounting, call center, collections, custom programming, and IT management are all available in Essential Services suite of offerings.

"AS A CREDIT UNION CEO AND CUSO SHAREHOLDER, I UNDERSTAND THE IMPORTANCE OF FINDING THE RIGHT PARTNERSHIPS AND INVESTMENTS FOR YOUR CREDIT UNION. WE HAVE ENJOYED EXPERIENCING BOTH WITH CU\*SOUTH AND SEEING OUR CREDIT UNION PARTNERS BENEFIT FROM THE CUSO'S ALL-IN-ONE SOFTWARE SYSTEMS, AS WELL AS A NUMBER OF STAFFING SUPPORT SERVICES FROM COLLECTIONS, ACCOUNTING, AND IT TO DATA ANALYTICS, LENDING SPECIALTIES, AND MUCH MORE."

> Rick Preble, President/CEO RVA Financial Credit Union, \$80M in assets

We firmly believe financial institutions with the heart to believe in and support the credit union industry's mission will find success by combining talents through our member-owned CUSO. From our partnerships, we know today's challenges are opportunities to grow a new and better way forward tomorrow.

As part of the cuasterisk.com network with a community of over 362 credit union partners across 42 states, the fourth largest provider of core services, and as a 100% credit union-owned CUSO, CU\*SOUTH was founded in July 2006 with a mission to grow credit unions.

Our goal is to be the leading source of solutions that empower our credit union community to be heroes for their 2.8 million members by offering our all-in-one core software system and staffing support for such areas as accounting, collections, and IT.

# RUTUAL FUNDS FOR CREDIT UNIONS BY CREDIT UNIONS

# Put Excess Liquidity to Work

Invest your credit union's excess liquidity with the Trust for Credit Unions (TCU), the first and largest family of mutual funds created by and for leading credit unions.

Our Portfolios are actively and professionally managed by ALM First Financial Advisors, have over 30 years of performance, and are based on the cooperative values of credit unions.

We offer two fixed income mutual funds that comply with NCUA investment regulations, provide next-day liquidity, and are designed for the diverse needs of our credit union investors:

- Ultra-Short Duration: 3-month duration target
- Short Duration: 2-year duration target

To learn more about how TCU can help your credit union, visit **www.trustcu.com** or call us at **(800) 237-5678**.

The Trust for Credit Unions is a registered open-end, management investment company (commonly known as a mutual fund) that offers portfolios solely to U.S.-domiciled state and federally chartered credit unions. An investment in a Portfolio is not a credit union deposit and is not insured or guaranteed by the National Credit Union Share Insurance Fund, the National Credit Union Administration, or any other government agency. An investment in a portfolio involves investment risks, including possible loss of principal. An investor should consider a portfolio's investment objectives, risks, charges and expenses carefully before investing or sending money. This and other important information about the portfolios can be found in the fund's prospectus. To obtain a prospectus, please call 1-800-DIAL-TCU or visit www.trustcu.com. Please read the prospectus carefully before investing.

MIKE BASS REGIONAL SALES MANAGER

mbass@cspiinc.com (317) 600-7028 <u>https://auroradigitalbanking.com/</u> 805 W Stadium Blvd. Jefferson City, MO 65109

## **COMPANY OVERVIEW**

As a valued software & service provider, CSPI focuses on the needs of today's progressive financial institutions. Our comprehensive Aurora Advantage product line offers core solutions, online and mobile banking, document imaging, item processing, remote deposit capture, and managed services.

CSPI is core-agnostic and utilizes API technologies to deliver a seamless interface. Let us help automate processes to gain efficiencies while delivering industry-leading digital banking solutions that are focused on the user experience.

## WHY CSPI AURORA ADVANTAGE

- **Commitment:** We are committed to offering a modern, flexible, cost-efficient, and scalable core solution to grow with your credit union.
- Service: Our service goes beyond our partnership with our clients. All solutions are developed with your members' experience in mind, creating a seamless omnichannel digital banking experience.
- **Partnership:** Our team is dedicated to our mission of exceeding customer expectations.

#### FLEX

PRESTON PACKER CMO preston@flexcutech.com (801) 365-5000 www.flexcutech.com 8520 S Sandy Parkway, Sandy, UT 84070

## **COMPANY OVERVIEW**

FLEX has disrupted the credit union core system marketplace by enabling efficient solutions for digital transformation and sustainable growth. FLEX will allow credit unions to launch a fullservice digital banking suite with innovative member-facing technologies and automated services. Credit unions will buy back lost time by remapping the digital journey and increasing member loyalty.

## WHY FLEX

- **Efficient.** Browser-based design enhances employee productivity, while increasing system speed and deliverability. Do more with less with FLEX.
- **Complete.** FLEX is a complete corebased digital transformation solution for credit unions, allowing omnichannel processes providing a single view of member interactions.
- **Growth.** FLEX enables credit unions to grow utilizing technology trends in delivering member-centered solutions and disrupting traditional banking models.

#### JACK HENRY™

TRACY ALMQUIST SENIOR MARKETING MANAGER

talmquist@jackhenry.com (619) 542-6951 <u>www.jackhenry.com</u> 663 W. Hwy 60, P.O. Box 807, Monett, MO 65708-8215

## **COMPANY OVERVIEW**

At Jack Henry<sup>m</sup>, we believe the world is a better place with community and regional financial institutions. And we intend to keep it that way. For more than 45 years, we've put financial institutions at the center of our modernization. We're here to help you innovate faster, differentiate strategically, and compete successfully – all with one goal in mind: to improve the financial health of the members you serve. Visit **jackhenry.com** to learn more.

## WHY JACK HENRY

- Increase your operational efficiency: Improving operating efficiencies is an industrywide, strategic goal for credit unions. Jack Henry can help you streamline processes to operate more efficiently, saving time, money, and resources.
- Proactively manage and mitigate risk: Jack Henry is uniquely positioned with sophisticated technology and deep expertise to help you manage enterprise risk.
- Enhance the member experience: Jack Henry's technology and experience helps credit unions strengthen relationships while delivering member-centric experiences that are simple, secure, relevant, and seamless.
- **Conquer revenue challenges:** Industry challenges are impacting the ability of credit unions to generate and grow sources of revenue. We are positioned to help you optimize near-and long-term revenue opportunities.

#### **MEMBER DRIVEN TECHNOLOGIES**

GARY LEE CHIEF CLIENT OFFICER

glee@mdtmi.com (586) 698-1319 <u>www.mdtmi.com</u> 30230 Orchard Lake Rd., Farmington Hills, MI 48334

## **COMPANY OVERVIEW**

Member Driven Technologies (MDT) provides a private cloud alternative for core processing and IT needs. The CUSO hosts the Symitar<sup>®</sup> core platform from Jack Henry<sup>™</sup>, as well as dozens of seamlessly integrated solutions and supporting services to help run the entire institution, such as digital banking, payments, lending, cybersecurity, and imaging. Rounding out its comprehensive suite, MDT also offers business continuity, disaster recovery, and regulatory solutions, as well as consulting, data analytics, email hosting, and hardwarepurchasing services.

## WHY MDT

- Our hybrid, online solution means that MDT handles the lion's share of the technology needs while our credit union clients maintain a laser-like focus on delivering a great member experience.
- In addition to core processing, we offer topnotch, best-of-breed financial products and services within our CUSO model, and share the cost of them across multiple clients, meaning that even smaller credit unions can afford them.
- Our clients range in size from modest to 99,000+ members/\$1+ billion assets, all possible because of our sophisticated offerings, competitive pricing, and dedicated and knowledgeable staff.

# connecting possibilities

Our ability to drive innovation through technology is rooted in the belief that people should be at the center of everything we do.

With Jack Henry™, you can strengthen the connections between your credit union and the members you proudly serve, reduce the barriers to financial health, and empower people and communities to gain the financial freedom to move forward.

Learn more about our people-inspired innovation that promotes deeper relationships between your credit union and members at jackhenry.com.
